

Advarra CIRBI Version 2026.6

May 20, 2026

In this release, we've introduced the following features:

Dashboard

- Continuing review submissions in the CR Complete status are now listed in the Submissions Completed tab of the dashboard. (CRB-27748)

Submission Forms and Activities

- For all submission types except continuing review or termination submissions, the Contact IRB activity is no longer available in the Pre-Submission or Awaiting Assignment status. This ensures that messages can only be sent after an appropriate recipient has been assigned to the submission. (CRB-27382)
- Users are now prevented from adding inactive users as submission contacts. (CRB-27428)
- Users can now drag-and-drop files directly onto form and activity fields. (CRB-27123)
- Free-text fields in submission forms now resize dynamically so that text in the field is always displayed in full. (CRB-27493)

Submission Workspace

- In the Submission History section on the submission workspace, users can now view records in a single list view by clicking a "Load More" button. Previously, the list was paginated. (CRB-27257)
- Site submission names are now updated to reflect the new principal investigator's name when a Change of Principal Investigator modification is approved. (CRB-27080)

User Profile

- Users can now manage their own security question and answer in their profile. (CRB-27673)
