

# Advarra CIRBI Version 2026.5

April 30, 2026

In this release, we've introduced the following features:

- Advarra Connect integrations are now supported. Contact your Advarra Client Executive or Strategic Partner for additional information. (CRB-22736)
- Enhanced searching for other CIRBI users whose names contain accented characters (such as é). (CRB-26811)
- Enhanced security to prevent users from downloading potentially malicious files. (CRB-26871)
- The attestation page for each new submission is now displayed in the associated Submission History log record (submission workspace > Submission History > Submitted for Review record). (CRB-26869)

In addition, we've also resolved the following:

- For Audit Report reportable event submissions, the Audit Information submission form now uses the word "audit" in questions instead of "inspection" for accuracy and clarity. (CRB-27040)
