

CIRBI Release Highlights

Version 2026.8

Released July 1, 2026

This document includes high-level information about key changes in this release. Note that this is not a comprehensive list of all changes made in the release; instead, we've focused on new features that are available and other changes that might impact users.

In this release, we've introduced the following features:

Submission Forms

- The submission date is now displayed on the Submission Form page. (CRB-28548)
- The submission date and submission name are now displayed on the Submission Form Printer Version page. (CRB-28615)

Submission Notifications

- For multi-site submissions, only protocol-level contacts receive a notification when Advarra staff request sponsor/CRO sign-off for site continuing review or termination submissions. (CRB-28553)

User Interface

- We've updated the CIRBI logo in the application to reflect our current branding. (CRB-28765)

In addition, we've resolved the following:

Submission Workspace

- The Translation Type column in the Site Information export is now populated. (CRB-28770)
- On a site-level IRB Issued Documents page, site contacts can now download posted study-level documents without encountering errors. (CRB-28771)
