CIRBI Release Highlights

Version 2026.12

Released September 23, 2026

This document includes high-level information about key changes in this release. Note that this is not a comprehensive list of all changes made in the release; instead, we've focused on new features that are available and other changes that might impact users.

In this release, we've introduced the following changes:

Dashboard

New Exports Now Available

Users can now export the following dashboard tabs and sub-tabs in .csv format using the standard Export button functionality:

- Attention Required tab
- My Studies tab > All, Protocols, and Sites sub-tabs
- Submissions In Progress tab

Note that the exported file respects any filtering or sorting that's been applied. (CRB-31168)

My Studies > Submitting Organization Column

A Submitting Organization column is now included in all sub-tabs within the My Studies tab to identify the organization that submitted a listed submission. Users can filter and sort the lists on this column. (CRB-31128)

Submission Forms

Informed Consent and Authorization Form Updates

The Informed Consent and Authorization section of submission forms for single- and multi-site protocol submissions has been updated to remove unnecessary response options and streamline the submission process. (CRB-31264)

Site and Local Context Information Form Updates

The Site and Local Context Information section of submission forms for site and single-site protocol submissions has been updated to make the Actions & Restrictions field multi-select and to streamline the submission process. (CRB-30907)

Site Information Form Updates

The Site Information section of submission forms for multi-site protocol submissions has been updated to remove unnecessary response options and streamline the submission process. (CRB-30975)

Scrolling Error Resolved

We've fixed an issue that might have prevented users from being able to scroll all the way down submission form sections. (CRB-31351)

Submission Workspace

Download Sponsor-Submitted Modification Documents

Site contacts can now download IRB-issued documents that were posted for a sponsor-submitted protocol modification. (CRB-31126)

Site Information > Submitting Organization Column

A Submitting Organization column is now included in the Site Information section on the submission workspace to identify the organization that submitted a listed submission. Users can filter and sort on this column. Additionally, the column is included in exported .csv versions of this section. (CRB-31040)

User Profile

Regulatory Inspection Records in Investigator Profile

A PI user's regulatory inspection records are now included in their investigator profile (user menu > My Profile > Investigator Profile > Regulatory Inspection Information). (CRB-31039)
